Web Applications

Our web-based applications provide a unique opportunity to quickly provide pertinent information through the Internet on a secure site. This is a significant value to Lear and the Supply Community as we are able to reduce redundant data entry and ensures data accuracy while improving the time required for analysis.

+ Lear Web Applications

Online Quoting

This system is used when submitting RFQ and ECN quotes to Lear.

Supply Viz Self Service

Suppliers that have access to this site may enter and / or upload company related information.

Supplier Rating System

This system is used to retrieve the monthly supplier scorecards.

Purchase Order Retrieval

This system is used to retrieve production purchase orders.

Supplier Bulletins

This system is used to view important bulletins from Lear.

Supplier Diversity Reporting

This system is used to enter quarterly diversity purchases via the M-Tier Diversity Reporting web site.

ProFile

This system is used to enter Supplier APQP/PPAP data and submit SCTO ideas.

Supplier Quality Tracking System

This system is used to answer Quality Notices generated by Lear plants.

Supplier EDI Access

This system is used to retrieve Supplier EDI information

Supplier SCTO Ideas

Submit ideas for Supplier Cost/Technical Optimization

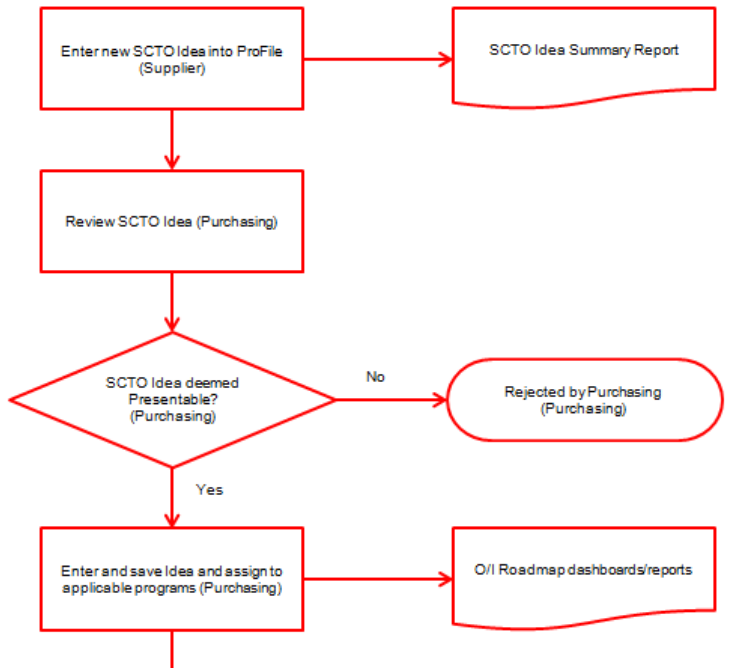

- Click on **Supplier APQP/PPAP** to view Programs and Parts
- Click on **Supplier SCTO Ideas** to submit ideas (**New!**)

The Supplier SCTO Ideas module strengthens capabilities and tools for Lear Global CTO operations by expanding the capabilities of the O/I Roadmap module within ProFile, enabling the Lear supply base to input SCTO ideas directly into ProFile, replacing a manual process that is being used today.

Supplier Cost/Technical Optimization (SCTO/VAVE)
